Subject: NJRA: Upcoming Green Building Workshop

Dear Municipal Clerk:

The NJRA Redevelopment Training Institute (NJRA RTI) offers intensive intermediate-level training courses that focus on the redevelopment of New Jersey's communities. NJRA RTI has been designed to provide nonprofit and for-profit developers, professional consultants, entrepreneurs and city/county staff with a body of knowledge of the redevelopment and real estate development process.

The goal of NJRA RTI is to provide classroom instruction outlining the nuances of the redevelopment planning process in New Jersey, to focus on real estate development and to unlock the key to understanding real estate finance. In addition to its regular offering of redevelopment training courses, the Redevelopment Training Institute offers a host of one-day workshops. These workshops cover both key topics and specialized issues surrounding redevelopment issues. Each session is interactive and focuses on real life experiences, best practices and tools you can bring back to your respective areas.

NJRA RTI Green Building Workshop
Wednesday, June 23, 2010
Thomas Edison State College
101 W. State St.
Trenton, NJ 08625
Time: 9 a.m. - 4 p.m.

Cost: Special 50% Discount for Municipalities - Only Pay \$37.50!

The Green Building Workshop is the next logical step in the NJRA RTI course offerings. Participants will gain a more in-depth knowledge of the commonly used terms "sustainable development" and "green building."

During this workshop, expert consultants and developers who are well-versed in sustainable design, construction, operations, and planning will identify ways to reduce the burden on the environment in terms of resources, land use, and air and water quality. The goal is to highlight innovative models and best practices from New Jersey, New York and Pennsylvania.

In addition, this workshop will provide an opportunity for lenders, business service providers and governmental agencies to share their resources and programs that can facilitate sustainable development practices. Participants will leave this workshop encouraged to plan, design, construct, and maintain buildings, neighborhoods, and cities that are more environmentally-friendly for everyone.
